

Rahul Sharma

Backend / Full-Stack Developer | Bangalore / Remote | No night shifts
rahul.sharma.dev@email.com | +91 98765 43210 | linkedin.com/in/rahulsharma-backend

SUMMARY

Backend developer with ~3 years of experience building Node.js and PostgreSQL services. Strong interest in fintech and deep-tech products. Comfortable owning APIs end-to-end, improving reliability under load, and collaborating with product teams. Currently leveling up in system design and AWS. Past exposure to Android basics.

EXPERIENCE

Backend Engineer - PayFlow Technologies, Bangalore

Jan 2023 - Present

- Designed and operated a payments API serving high transaction volume with zero planned downtime.
- Built Node.js services on PostgreSQL with idempotent payment flows, retries, and audit logging.
- Reduced p95 latency on checkout endpoints by optimizing queries and connection pooling.
- Partnered with product and mobile on mid-level backend and full-stack merchant dashboard features.
- Added monitoring and runbooks so on-call could recover from provider outages without night shifts.

Software Engineer (Backend) - Nimbus Soft, Hyderabad

Jul 2021 - Dec 2022

- Developed REST APIs in Node.js for internal tools and customer-facing workflows.
- Modeled relational data in PostgreSQL; wrote migrations and indexes for growing datasets.
- Contributed early Android prototypes (Java/Kotlin basics) before focusing fully on backend.

SKILLS

- Languages & runtime: JavaScript, TypeScript, Node.js
- Data: PostgreSQL, Redis (basic), SQL query tuning
- APIs & practices: REST, webhooks, idempotency, logging, testing
- Cloud & learning: AWS (in progress), system design fundamentals
- Other: Git, CI basics; Android fundamentals (past)
- Preferences: Bangalore or remote; daytime IST hours; fintech / deep-tech domains

EDUCATION

B.Tech, Computer Science - VIT University

2017 - 2021
